Dear all,

a new patch release of ilcSoft v01-14-01 is available.

The only change with respect to v01-14 is a bug fix release of Mokka:

New tag mokka-08-00-03
=====

What is new in this Mokka release
=====

- bug fix for applying Lorentz boost for crossing angle
(was applied twice when reading stdhep files)
thanks to A.Sailer for spotting this

v01-14-01 is now the production release that will be used for the DBD simulation.

This release works with the current detector models

ILD_o1_v05
ILD_o2_v05
ILD_o3_v05

Use the ilcinstall tool with the appropriate configuration files in order to install ilcsoft v01-14-01.

Reference installations in afs are available at:

/afs/desy.de/project/ilcsoft/sw/i386_gcc41_sl5/v01-14-01 # SL5 32bit
/afs/desy.de/project/ilcsoft/sw/x86_64_gcc41_sl5/v01-14-01 # SL5 64bit

Please report any problems and questions regarding this release in this forum.

Frank, for the iLCSoft team.
